

## **Annotation**

Pre-diploma practice is associated with a bachelor's degree project on "System of intellectual wireless data transmission". In pre-diploma practice I used the theoretical skills gained at the university.

The main task was to identify the prototype for further development and improvement in the graduation project.

In practice, I was engaged in the fact that I did a market review, analyzed the products of different manufacturers, and studied their characteristics, defining the shortcomings and advantages of specific models.
