

SUMMARY

pre-graduation practice report

studenta gr. PI-41

Bratslavskogo Timofeya Vyacheslavovicha

on " Development of design project "

The report of the pre-diploma practice are the results of research on radiohidroakustychnohobuyu (RHB). Elaboration of mechanisms for installing and dismemberment modules detection stations.

The report contained 16 pages of printed text, which consists of an introduction, five chapters, conclusions, literature and contains 7 figures and 1 table.

The introduction describes the purpose of pre-diploma practice and its problems. The first part of the report is devoted to analysis of the company. The second presents individual task. The third section describes software Solidworks and use this program for designing devices. The following elaboration of mechanisms for installing and dismemberment modules detection stations. In the final part of the review of the types, design and hydroacoustic work buyu.

As a result of pre-diploma practice have been improved theoretical knowledge of design documentation, knowledge acquired and expanded on the theme praktyky made conclusions on the feasibility of using the technology.
