

Student: Bondarenko A.(PM-41)

Teacher: Andreyeva O.

Enterprise: SE "Ukrmetrteststandard"

Annotation

Pre-diploma practice is connected with the diploma project of the bachelor on the topic "Intelligent home". In pre-diploma practice, I used the theoretical skills acquired at the university.

The aim of pre-diploma practice is to get students practical skills after studying the theoretical material and the new information necessary for writing a diploma project.

In practice, I got acquainted with the equipment of the department. The bench of the disk bend, the reference kiosks, dynamometers, stands for measuring girder deformation and torque was presented in the laboratory.

The obtained knowledge on the measurement of the above quantities can be applied to the system of protection and counteraction to breakdowns and damage to systems of "smart home"

Key words: deformation, dynamometer, torque, counteraction.
