

Annotation

Pre-diploma practice is associated with a bachelor's degree project entitled on "Capacitor MEMS sensitive stabilizer element Arms of the easy armored equipment".

Main types of the easy armored equipment are considered. The review of the main types of stabilizers is carried out, their main components are considered.

The main kinds of capacitor MEMS of sensitive accelerometers as perspective stabilizers of the easy armored equipment are analysed. It is offered the new accelerometer of capacitor MEMS which will be developed in the degree project of the bachelor.
