

Enterprise: SE “Ukrmeterteststandart”

Head of practice from the university: Zaitsev V. M.

Student: Galuzinsky O. M., PM-81mp, 6th year student

Annotation

To pass undergraduate practice I was sent to State Enterprise “Ukrmeterteststandart”, where I studied modern methods and equipment designed for study of devices and systems.

SE “Ukrmeterteststandart” is the enterprise of the European level in the area of standardization, metrology and assessment of conformity that constantly improves effectiveness of its work, aspirates to meet the highest world’s standards.

The main task at the enterprise was to learn technical base of model of control equipment and acquire practical working skills. Graduation methodology and carrying out of experimental researches of loud cells were developed as well as calibration algorithms for system of weight center position measurement of four sensor system was developed and system of linear equations of task identification parameters of weight center position measurement system was developed.
